Resume Website: <https://jca-dev.github.io/Bootstrap-Resume/>

I am an eager Junior Full-Stack Web Developer that's new to the industry, full of motivation and a spongy brain ready to absorb information.

I have strong problem solving skills with great attention to detail.

Being proficient in working with Front End Software Development languages such as HTML, CSS, JavaScript I have expanded my knowledge base with Back End experience using Python, Django and JavaScript Object Oriented Programming.

My background is mainly customer service experience (11 years) meeting and helping people from all around the world.

I also have 6 years safety critical experience in the rail industry.
